

Sargis Sargsyan

SENIOR / LEAD HTML5 GAME ENGINEER

Professional Summary

Senior / Lead HTML5 Game Engineer with 15+ years of experience building browser-based games, interactive experiences, reusable frameworks, and production tooling. Strong hands-on expertise in TypeScript, JavaScript, PixiJS, WebGL, Canvas, game architecture, animation systems, platform integration, and mobile performance optimization. Experienced leading developers, reviewing code, defining technical direction, and delivering reliable products from concept and prototype through production, release, and ongoing optimization.

Employment History

Frontend Team Lead, Ixilix

FEB 2026 — MAY 2026

Led frontend engineering for multiple real-money browser games, owning architecture, feature delivery, performance optimization, and production releases.

- Built responsive game interfaces, live-results widgets, side-bet flows, profile systems, tutorials, animations, analytics events, and backend-integrated features using React, TypeScript, and PixiJS.
- Reviewed code, planned technical work, mentored developers, and coordinated frontend, backend, QA, animation, game design, and product teams.
- Improved shared frontend architecture, reusable components, mobile layouts, release workflows, and production stability across multiple branded game variants.
- Optimized assets, audio, loading, requests, memory usage, and runtime behavior for lower-end mobile devices, reducing one game package from approximately 62 MB to 9.6 MB.

Technical Lead, Playrix, Yerevan

JUN 2025 — JAN 2026

Led development of a reusable HTML5 game framework and production pipeline for lightweight, high-performance browser experiences.

- Designed shared runtime modules, asset-loading systems, templates, and development tooling using TypeScript, PixiJS, Matter.js, Spine, and GSAP.
- Built gameplay mechanics, physics interactions, tutorials, animations, visual effects, game states, and complete win/fail flows.
- Reduced build size from approximately 4.2 MB to 1.4 MB and loading time from approximately 2.5 seconds to 1.6 seconds.
- Optimized textures, audio, animation assets, memory usage, and runtime performance for lower-end Android devices and strict platform constraints.
- Established reusable engineering patterns, automation, review practices, and delivery workflows that improved production speed and release reliability.

Senior Game Engine Developer, RubyPlay

SEPT 2024 — JUN 2025

Developed reusable HTML5 game-engine systems and production frameworks for browser-based games.

- Built shared runtime modules for game states, asset loading, configuration, animation systems, platform integrations, and release tooling.
- Improved engine performance, memory usage, runtime stability, and release reliability across multiple production titles.
- Integrated Sentry and strengthened error tracking, debugging, monitoring, and production diagnostics.
- Investigated and resolved rendering, loading, integration, and runtime issues in collaboration with game design, mathematics, backend, QA, and product teams.

Skills

- HTML5 Game Development
- TypeScript / JavaScript
- WebGL / Canvas
- Game Architecture
- Game Frameworks
- Gameplay Systems
- State Machines
- Physics Systems
- Animation Systems
- Performance Optimization
- Memory Optimization
- Asset Optimization
- Mobile Optimization
- Platform Integration
- Profiling & Debugging
- Tooling & Automation
- CI/CD & Releases
- Technical Leadership
- Code Reviews & Mentoring

Lead HTML5 Game Developer, Voodoo

SEPT 2023 — SEPT 2024

Led development of high-performance HTML5 game experiences for mobile web and third-party platforms.

- Built complete browser-based games using JavaScript, TypeScript, PixiJS, Canvas, and WebGL.
- Implemented gameplay mechanics, controls, game states, animations, visual feedback, and completion flows from concept through production.
- Created reusable gameplay systems, technical templates, and production patterns that accelerated delivery across multiple projects.
- Optimized code, textures, audio, animations, and asset loading for fast startup, small package sizes, and stable mobile performance.
- Reviewed technical solutions and collaborated with game design, art, creative, product, and marketing teams.

Co-Founder & CEO, Armath (formerly Koreez), Yerevan

JAN 2016 — SEPT 2023

Co-founded and led an independent game studio developing mobile, PC, and browser-based games for international audiences and clients.

- Led multidisciplinary teams across engineering, game design, art, animation, QA, and production from concept through release.
- Defined product direction, technical architecture, development processes, hiring plans, and delivery workflows.
- Designed and implemented gameplay systems, UI, animations, physics, progression, and reusable game architecture.
- Built internal tools and production workflows that supported rapid prototyping and multi-platform delivery.
- Managed client relationships, project delivery, publishing, and live support while remaining hands-on with engineering.
- Contributed to internationally released titles including *Roofbot* and *Parallyzed*.

Senior Software Engineer, Rockbite, Yerevan

JUN 2014 — MAY 2015

Developed cross-platform mobile games and internal game-development tools for iOS and Android.

- Implemented gameplay systems, user interfaces, animations, and platform-specific functionality using Java, libGDX, and RoboVM.
- Contributed to Overlap2D, a visual editor and runtime workflow for 2D game development.
- Built reusable tools and systems supporting scene creation, asset workflows, and cross-platform production.

Game Developer, Plexonic, Yerevan

JAN 2011 — JUN 2014

Developed mobile and social games for iOS, Android, and Facebook.

- Implemented gameplay mechanics, levels, UI flows, animations, and reusable game systems using ActionScript, Adobe AIR, and Flash.
- Built production-ready features across multiple titles and platforms.
- Collaborated with game designers, artists, backend developers, and QA throughout development, testing, and release.

Education

M.Sc. & B.Sc., Mathematics & Computer Science, National Polytechnic University of Armenia
