Sargis Sargsyan

Principle Software Engineer

Profile

Experienced **Senior Game Engine Developer** specializing in **HTML5 game development** and **game engine optimization**. Skilled in **WebGL, PixiJS, Phaser**, and **Three.js**, with a focus on enhancing **performance**, **scalability**, and **user engagement**.

As a **former CEO and Co-Founder**, I have led teams in creating **innovative playable ads** and **immersive web-based games**. Currently at **RubyPlay**, I work on **game engine optimization**, **asset loading**, and **cross-team collaboration** to drive cutting-edge gaming experiences.

Employment History

Programming Lead at Playrix, Yerevan

Jun 2025 — Present

At Playrix, I lead the development of the next-generation playable ads framework, building a scalable platform for 2D and 3D interactive experiences. My role involves:

- Designing and driving the architecture of a unified, future-proof playable framework.
- Developing tooling and automation to improve developer efficiency and reduce production overhead.
- Optimizing performance across rendering, asset pipelines, and build systems to ensure fast, lightweight playables.
- Collaborating with engineers, artists, and QA to establish a seamless CI/CD pipeline and reliable production flow.
- Introducing improvements to processes, standards, and workflows to enhance delivery speed and consistency.

Senior Game Engine Developer at RubyPlay

Sept 2024 — Jun 2025

At RubyPlay, I contribute to the development and optimization of the game engine, ensuring smooth performance and scalability. My role involves:

- Enhancing **game engine performance** to support high-quality, responsive gaming experiences.
- Optimizing **asset loading and rendering** for maximum efficiency and minimal load times.
- Collaborating with cross-functional teams, including **QA, backend, and front-end developers**, to integrate new technologies.
- Implementing **Sentry integration and monitoring**, improving error tracking and debugging processes.
- Streamlining **deployment workflows**, ensuring seamless game releases and framework updates.

Lead HTML5 Game Developer at Voodoo

Sept 2023 — Sept 2024

As the Lead HTML5 Game (Ads) Developer, spearheaded a dynamic team, seamlessly blending technology and marketing.

In this role:

- Crafted innovative HTML5 applications that captivated users, achieving an increase in user engagement.
- Employed cutting-edge web technologies and mobile optimization techniques, resulting in a 25% improvement in ads performance.
- Aligned development with marketing strategies, contributing to an increase in game downloads.
- Optimized user experiences across platforms, ensuring accessibility.

Co Founder & CEO at Armath, Yerevan

May 2020 — Sept 2023

At Armath, led the charge in propelling the startup into collaborations with industry titans such as Twitter, Playrix, and Voodoo. These partnerships validated our innovative approach to gaming and expanded our reach within the digital marketplace.

Highlights include:

- Pioneered playable ads, seamlessly integrating attractive gameplay experiences within ads and redefining engagement metrics, setting new industry benchmarks.
- Transformed HTML5 game development, unlocking new dimensions of game creation and delivering immersive experiences across platforms and devices.
- Positioned Armath as an industry trailblazer in harnessing the potential of HTML5.
- As Executive Officer, fostered a culture of open communication and boundless creativity, channeling collective energy into crafting high-quality games that resonate deeply with players.

Co Founder & CEO at Koreez, Yerevan

Jan 2016 — May 2020

Leading the growth of Koreez, a startup dedicated to bringing high-quality games to the digital marketplace.

Since founding the studio in 2016:

- Established Koreez as a promising startup with several original game ideas.
- As Executive Officer, focused on product development, product strategy, and brand development.
- Energized the team with constant communication, fostering creativity, and developing effective solutions to accomplish goals.
- Driven by a passion for technology, continuously learning to stay ahead in the industry.

Senior Software Engineer at Rockbite Games Armenia, Yerevan

Jun 2014 — May 2015

- Led the forefront of cross-platform game development for iOS and Android, leveraging the power of Java/libGDX/roboVM.
- Developed the innovative Overlap2D game editor using Java/libGDX.

Game Developer at Plexonic, Yerevan

Jan 2011 — Jun 2014

- Directed cross-platform mobile game development for iOS, Android, and Facebook, leveraging AS3/Adobe Air/Flash.
- Played a pivotal role in the innovative development of games across multiple platforms, ensuring seamless user experiences and broad market reach.

Education

Master's degree, Mathematics and Computer Science, National Polytechnic University of Armenia

Jan 2010 — Jan 2012

Bachelor's degree, Mathematics and Computer Science, National Polytechnic University of Armenia

Jan 2006 — Jan 2010
